

Pocket-sized machine analyzer ...

Condition Monitoring ◀

Press release: VIBROTIP - Machine analyzer & data collection
Direct enquiries to: Fax: +49 (0) 89/99616-200, Mrs. Brandmeir
eMail: info@pruftechnik.com

1 Pocket-sized machine analyzer collects maintenance
2 data

3 What's the best way to prevent unexpected machine
4 breakdown? Trend analysis of machine health indi-
5 cators can go a long way toward that goal - but
6 who wants to lug along a whole array of special-
7 ized meters on daily rounds - and wade through
8 tons of data afterward?

9 Now Prüftechnik AG of Germany offers the answer.
10 Its new VIBROTIP measures, evaluates and displays
11 bearing condition, vibration severity, liquid and
12 surface temperature, cavitation and machine RPM -
13 all in one handy instrument with its own built-in
14 sensors.

15 VIBROTIP stores all these data at the touch of a
16 key and transfers them to a PC for long-term stor-
17 age, trend analysis, and chart plotting: TIPTREND
18 software provides quick and confident analysis of
19 trouble spots. It also programs measurement routes
20 into the VIBROTIP with unprecedented ease to
21 streamline data collection at regular intervals.

22 Ease of use received top design priority for both
23 analyzer and software, and the compact, battery-
24 powered meter is made to withstand rough industri-
25 al environments as well: it is waterproof, dust-
26 proof (IP65) and shockproof over a wide range of
27 operating temperatures. Intrinsically safe and
28 mining safety versions are also available for use
29 in hazardous areas.
